only, Chemistry, the Classics, and higher A Derangement of the Nervous System. Derangement of the Nervous System.

67- In NERVOUS COMPLAINTS, Drings and Methemes increase the disease, for they weaken the vital energies of the already prostrated system; while under the strengthening. Bite giving, vitalizing influence of Calcanism, as applied by this beautiful and wonderful diseasers, the exhausted patient and weakened sufferer is restored to former health, strength, classicity and vigor.

The great poculiarity and excellence of

Dr. Christie's Galvanic Curatives, consists, in the fact that they arrest and cure disease by automed apply also. In place of the usual mode of dengging and physicking the patient, till exhausted Nature links hapely-sky maler the infliction.
They strengthen the whole system, equalize the circulation of the blood, promote the secretions, and never do the rightest injury under any circumstances. Since their introduction in the United States, only three years since, more than

60,000 Persons terinding all ages classes and conditions, among which were a large number of ladies, who are peculiarly subject to Nervous Complaints, have been ENTIRELY AND PERMANENTLY CURED, when all hope of relief had been given up, and every thing else been tried in vain!

To illustrate the use of the GALVANIC BELT. To illustrate the use of the GALVANIC BELT, suppose the case of a person adheted with that bane of eavilization. DVSPLPISIA, or any other Chronic or Nervous Disorder. In ordinary cases stimulants are taken, which, by their action on the nerves and noiseles of the stomach afford temperary relief, but which leave the patient in a lower state, and with murrel faculties, after the action thus excited has ceased. Now compare this with the effect resulting from the application of the GVLVANIC BELT. Take a Dysnectic sufferer even in the worse symptoms of an attack, and simply the the Belt around the body, using the Wagnetic Finid as directed. In a short period the miseisable perspiration will act on the positive element of the Belt threups a talvanic circulation which will pass on to the negative, and thence back again to the positive thus keeping up a continuous Gelvanic circulation throughout the system. Thus he most severe cases of DVSPEPSIA are PERMANENTIA, CURED. A FEW DAYS IS OFTEN AMPLA SUPPOLENT TO ERADICATE THE DISEASE OF YEARS.
